ClicBox

Kitchen cabinets with a click system that make you the winner.

The UNICLIC technology

The UNICLIC technology is a tongue and groove solution which enables a click connection at an angle of 90°. This revolutionary technology makes it possible to assemble flat packed kitchen cabinets by simply clicking the components together, without requiring any tools, fittings or adhesive!

The UNICLIC for furniture technology has won the Interzum Award 2011 Intelligent Material & Design Best of Best.

STANDARD FEATURES

No tools necessary

Thanks to the UNICLIC technology it is possible to click the panels easily into each other without using any tools, adhesive or fittings.

Faster assembly

With the UNICLIC technology the panels can be assembled faster than in the case of a traditional kitchen cabinet. UNICLIC system white finish Chipboard

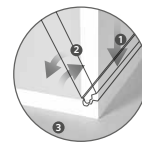

Flexible drilling template

The panels already feature a drilling template that matches the fittings of major suppliers. This drilling template offers you many options for the layout of your kitchen.

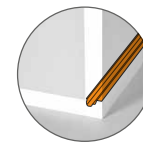

Fast & easy assembly

The panels of the kitchen cabinet only need to be clicked together. It is as easy as 1,2,3!

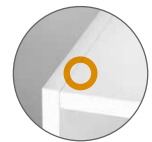

Stronger connection

The click connection is stronger than a traditional assembly system as the joints interlock along the entire assembly length instead of only on 2 fixing points.

No visible fittings

As there are no fittings required with UNICLIC, the technology is completely invisible.
